in the pouches of their karosses along with their babies. This puts a strict limit upon any desire to possess great quantities of property in movables. Furthermore, gift-giving keeps all personal property moving in a current through the region and no one possesses very much more than another. The determining factors in obtaining more than one wife are apt to be the personalities of the individuals and the man's ability to hunt. 'Women love meat', we were told, and like their husbands to be good hunters.

The number of wives a man may have is not regulated by social rules but by his ability to obtain and support them. This limits him usually to one. None of the nine polygynists in the band had more than two. However, we heard of a man named Gao, now dead, who had had four wives all at one time. He had been a fabulous hunter and maker of arrows and was the father of the /Ti/kay who is the husband of two sisters, /Naoka and /Nai, in Band 9.

Only two of the nine pairs of co-wives had traceable consanguineous relationship. The above /Ti/kay's wives were sisters—the only ones—and, in Band 10, Old ≠Gao's younger wife, /Ghia, was the BrDa of his older wife, Bau.

/Kwi, sister, is the term which co-wives apply to each other, unless they have the same name, in which case they term each other */gu!na*. The /Kung, though they do not institutionalize the sororate, say it is a good idea to marry sisters because they are not so likely to be jealous of each other as other women. /Ti/kay's wives, who appeared to live in harmony and affection and to support each other, provided an example of the validity of this opinion.

Marriage to the same man gives co-wives the joking relationship, and they do not observe the sitting or the name avoidance, though they may have avoided each other before marriage.

/Kung co-wives share one scherm and one family fire. The scherm, the little shelter of branches and grass which the women build, a half hemisphere in shape, is only 3 to 4 ft. wide on the open side, about 3 ft. deep at the centre, perhaps 4 to 5 ft. high at the peak. In it and in front of it, beside their one fire, the two wives live, share their man, share the food they gather, share the work of fetching water and wood, nurse each other's babies, and co-operate in whatever degree of harmony their spirits can attain.

Husbands and wives may sleep separately or lie close together, side by side, or feet to feet. The woman holds her infant in her arms. Young children sleep near by bundled together, two or three in one kaross. Girls at about seven or eight go to sleep with a grandmother or a widowed friend or relative. The boys of the band, beginning at the same age, all sleep at a boys' fire.

/Ti/kay (Band 9), husband of the two attractive sisters, sees to it that his wives lie close to him, especially on cold nights, one on each side. Sleeping thus they were like the three stars of Orion which we call the Belt, but which the /Kung say are three zebras, two females with a male between them.

It is under such conditions that the /Kung usually have sexual intercourse—at night, in their sleeping place. They cover themselves with their karosses and are very discreet. The position is to lie on the side, the man at the back of the woman. Men pull the labia of the women before intercourse. The wives of /Ti/kay told me that they took pleasure in intercourse. I asked them if they had orgasms. We had

[21 cont.]

648 The Bushmen as a whole are despised by the other peoples, but in individual cases they are feared, and not least by the Whites. The Bushmen are familiar with this attitude and conduct themselves accordingly.

797 The Bushmen accept a foreign point of view only with
177 great difficulty, if at all. The mission, accordingly, can show no noteworthy success among them. On the other hand, they
157 usually grasp the intentions of others more quickly than the ordinarily more superficial Blacks. Consequently, they give brief and precise answers to the questions put to them. When asked questions that they do not want to answer, they remain silent. At the same time, in dealings with them one should note that they tire very quickly when they have to do mental work, and then they will not answer further questions, not because they do not want to, but because they are too tired.

181 The Bushmen are not generous. Nevertheless, allow-
[574] ing a stranger to partake of a meal, as well as giving him some
609 of the available water, is wholly matter-of-course with them.
[431] They very rarely, however, give any of their personal belongings, weapons, ornaments, hides, and so forth, as presents. If they themselves receive presents, they are obviously delighted.
181 It is true that they do not express their gratitude with words,
577 [22] but anyone who does the Bushmen a kindness may be sure that they will manifest their gratitude by deeds to the point of self-sacrifice.

To help a fellow human being who is in trouble is a
[648] moral obligation. There is a report of a prospector who lost his way in the bush forest and was then saved by the Bushmen, with whom he could not even converse; they took care of him for several days and finally put him on the right path.

Agreements and promises are kept unconditionally by the Bushman, although it is true that he usually arrives a little too late. Once, when an ox from the ox-cart of the Catholic mission had to be left behind on the way to the Okovanggo, it was put in the care of the Bushmen and they were to deliver it at the time of the next full moon. The people kept their word, and the ox was delivered, well-fed, at the specified time.

As a comrade, the Bushman is reliable and faithful (1).

ple, according to custom, and, when the old headman died, took over the leadership of the people in the area. He was not the true headman—his position would not be inherited by his son, for headmanship is passed only from father to son—but he was recognized as headman while he lived and it was a great honor to him that this was so.

Tu's brother was the rightful headman of Gautscha, but he had abdicated to live with his wife's people in the north. Her elder sister's husband, a man named Gao Big Feet, also had a right to the leadership in that his wife, Dikai, was older than Tu. But neither ever contested Toma's position as leader, for it was not a position which Toma held by force or pressure but simply by his wisdom and ability, and people prospered under him. No Bushman wants prominence, but Toma went further than most in avoiding prominence; he had almost no possessions and gave away everything that came into his hands. He was diplomatic, for in exchange for his self-imposed poverty he won the respect and following of all the people there. He enjoyed his position, and, being strangely free from the normal strains and jealousies of Bushmen, he saw justice clearly and hence he led his people well. At Gautscha his werf had been right beside the werf of his father's murderer, for Toma was friendly even with him.

Toma had a short, stocky body and a shock of tangled hair. He was strong, too, and very co-ordinated, so that every motion he made was quick and controlled, and not a gesture of his was wasted. As a result of this enormous and unconscious control, accidents almost never happened to him. His face was broad, lined with many deep wrinkles at the corners of his eyes and mouth as though from smiling, though it was not from smiling that he got them but from years of squinting at the sun. His expression was usually dark and wondering, his forehead drawn intently into a frown, but

9: Thomas T-5 (1951-1955)1959
FX10 Bushmen FX10

from the foreheads of the antelope they kill and fashion them into bracelets which their wives wear on their arms. Short Kwi's wife and daughter wore dozens of these; their arms were covered and heavy with them. Short Kwi himself wore no ornament of any kind, nothing except a crown of badger hair which he owned for a while but later gave to Toma, the very crown that Toma's son now wore.

One day, said Toma, Short Kwi had been walking in the veld and had failed to watch where he was going. He had stepped on the tail of a puff adder, which had risen up and bitten his leg, just below the knee. It was a rare and terrible accident; in all the time we had been in the Kalahari we had known of only two people besides Short Kwi who had been harmed by snakes—a young boy bitten by a mamba who had died the day he was bitten, and a young woman who had been pulled into a waterhole by a water python and had drowned. Usually, snakes move away when you come near them, or if they don't, you can usually see them; but you can't walk with your eyes on the ground all the time, especially if you are hunting, as Short Kwi had been. His misfortune was regarded as a horrible accident and it was felt that the spirits of the dead were to blame. They had led Short Kwi down the very path the puff adder had chosen, and perhaps had even placed the snake where his foot was sure to fall. Toma and Goa Feet were very depressed to think of it. Although the talk turned to other things, Gao Feet mentioned the accident again and again; everything seemed to remind him of it. At last Toma said to us: "Perhaps you can help him hunt again. Since he was bitten his people have had no meat."

Toma told us that he had been with Short Kwi near Nama Pan when the third group of white farmers had arrived. The farmers had looked at Short Kwi and had offered to cut his leg off for him then and there. This had frightened the Bush-

9: Thomas T-5 (1951-1955)1959
FX10 Bushmen FX10
Kung

gether without speaking and then his wife lay down and he lay down and their fire began to die. Soon all the werf was dark.

In the morning, in the salmon dawn, the first light, we woke up to find doves singing and a fresh, warm wind blowing. It was easy to sleep now, and the people slept for hours, rolling away from their piles of ashes as the day warmed, until they lay curled or sprawled in all parts of the werf with Toma's son, by chance, asleep in the center, flat on his belly with his head in the curve of his arm, relaxed and strong and breathing deeply.

At noon the adults began to get up. The women went into the forest behind their werf for sticks to burn and a few roots to eat, and when they had built up their fires they roasted the roots and shared them with their families. Toma said that we would go back to Nama Pan right away, but his wife and the other women wanted to gather tsi; it was very abundant right beside the forest and they hated to leave all that food just lying there. "Perhaps other people will come here and eat it," said Tu, so Toma changed his mind and everyone took bags, nets, skins, anything that could be used as a container, and they spent the afternoon gathering tsi. They got mountains of it. There was plenty in the patch that they had chosen and with all of them picking the nuts from among the round leaves of the tsi plants they filled every bag, skin, and net that they had. They gathered almost three hundred pounds. The women felt so happy that they were singing a gay, light song in three or four parts. When the people had picked all they could find, when every possible bag was full, they said they were ready to go to Nama, but when we brought the jeep and began to load it they were already busy with their endless preoccupation, that of giving and receiving, and had already

9: Thomas T-5 (1951-1955)1959
FX10 Bushmen FX10
Kung

begun to give each other presents of tsi. Bushmen feel a great need to give and receive food, perhaps to cement relationships with each other, perhaps to prove and strengthen their dependence upon each other; because the opportunity to do this does not occur unless huge quantities of food are at hand, Bushmen always exchange presents of the foods that come in huge quantities, these being the meat of game antelope, tsi nuts, and the nuts of the mangetti trees, which at certain seasons are scattered abundantly all through the mangetti forests.

As we waited by the jeep Dikai gave a huge sack of tsi to her mother. Her mother gave another sack to Gao Feet's first wife, and Gao Feet gave a sack to Dikai. Later, during the days that followed, the tsi was distributed again, this time in smaller quantities, small piles or small bagfuls, after that in handfuls, and, last, in very small quantities of cooked tsi which people would share as they were eating. All this was very hard to trace, especially for us while we waited and loaded the jeep, for the large sacks were not handed around but rather were tossed into the jeep one on top of the other while the transactions went on vocally.

There is a further complicating factor in food distribution. The owner of the bag which is full of tsi or mangettis is the owner of all the nuts inside, no matter who gathered the nuts, just as the owner of an arrow, whether man or woman, is the owner of the largest share of the buck killed by the arrow, no matter who shot the buck. This is a practical arrangement, since all three of these important foods, oftener than not, are very far from the waterholes where the bands would be living. Usually, Bushmen have to travel for several days over waterless, scorching veld to reach tsi fields or mangetti forests, then have to carry their heavy loads back again to water. These journeys are too hard for young children, old people, cripples,

9: Thomas T-5 (1951-1955)1959
FX10 Bushmen FX10
Kung

484 women who are pregnant, or people who are ill. In fact, the
482 long journeys for the two kinds of nuts are undertaken only
422 by strong adults, who therefore must gather for all those who
431 stay behind. The system of Bushmen in these matters ensures that everybody gets enough. As it turned out, that afternoon we found that both Tu and Lazy Kwi had filled bags belonging to Lazy Kwi's wife, the bag that Lazy Kwi filled being the only one he had with him, and in this way his wife, who wasn't there and who so far knew nothing of her windfall, owned two bags of food which she would probably share with Lazy Kwi, who actually, that day, owned none.

At last, when many bags had changed hands, when everything movable including Tu's bag of grass—which she had emptied, tying the grass into a bundle with a strip of bark in order to free the bag for tsi—had been loaded into the jeep,
484 the people began to climb in and the jeep sank down on its springs, groaning dangerously as each person got on it and found a place to sit. When finally everyone was on and the springs still had not broken we drove away with extreme caution, barely moving when we came to bumps, with Toma and Gao Feet sitting on the hood and pointing the way to Nama.

522 As we crept along Toma told a lion story concerning some Bantu people at Kai Kai who tried to rid themselves of three lions that were attacking their cattle. As his story was extremely funny, his voice was often drowned out by the laughter of the others. He spoke so fast we could not understand him, but his wife laughed until she cried. Toma told the funniest parts of the story two or three times.

271 Just before we got to Nama, when the shadows of the bushes reached far over the veld and the western sky was blood red, thick with smoke, we reached a tiny waterhole

CHAPTER FOURTEEN

The Sun Dance

578 EARLY in the morning, when the sun was rising red into the
431 smoke and the sky was bright, we heard a woman quarreling at Short Kwi's werf. Her voice was strident, harsh, and loud, and carried well above the ordinary sounds of morning—children talking, firewood breaking as limbs were snapped for the breakfast fires—and, solicitous of Short Kwi, for today was the day he was going to Windhoek, we went over to see.

We saw a startling sight. Many people had got there before us, hearing the quarrel and being moved to go there out of curiosity, and it seemed as if everyone had already taken sides, for the people had arranged themselves in two groups facing each other and were fighting. The speaker, the woman whose voice had awakened us, was an old woman who lived at one of the farthest werfs, and her opponent, the person whom she was berating, was Gao Feet. These two sat on their haunches on opposite sides of Short Kwi's fire, leaning toward each other, glaring sourly. Arranged behind them were all the others. The larger group by far, including Toma, Tu, Dikai, and Lazy Kwi, crouched behind Gao Feet. Short Kwi him-

9: Thomas T-5 (1951-1955)1959
FX10 Bushmen FX10
Kung

self, on Gao Feet's side, was sitting propped on the blankets we had given him to keep him warm in case of shock, feeling better and obviously taking an interest, for the matter was clearly close to everybody's heart. In fact, everyone was so interested in the quarrel that no one looked up when we came, for the people all sat with their ears pricked, waiting for a chance to speak. They, too, were glaring, deadly earnest, as though the argument were for their lives. Now and then someone would contribute a word or two, but for the most part the old woman did the talking. She looked bitter as gall; her eyes were burning and she hissed like a goose; she was accusing Gao Feet of having failed to give her a present of tsi nuts when he had come to Nama. Gao Feet was rubbing his face and it began to look as if he were losing. He said, obviously having said it before, that he had brought only a few. The woman said, also not for the first time, that she had expected him to give her a present and now he was refusing to do so. It was her right, she said, her due. Toma edged himself forward until he was beside Gao Feet, his friend and brother-in-law, and together they tried to pacify her, telling her that really Gao Feet had none to give, but her eyes burned so fiercely and the people behind her glared so that Toma and Gao Feet lost conviction and before long they fell silent again, defeated by themselves, for what they had tried to say was true. Finally the argument centered itself at its probable source, a gift given to Gao Feet's father by the woman's father which had not completed itself in an exchange. The woman's father, now long dead, could not receive it, Gao Feet's father, living far away at another pan at the farthest end of Nyae Nyae, could not give it unless he moved to Nama, so it was up to Gao Feet to assume responsibility.

Throughout the two crowds, children were sitting wide-eyed and open-eared. Things like this are remembered and

9: Thomas T-5 (1951-1955)1959
FX10 Bushmen FX10
Kung

talked about always; Bushman children listen for hours to discussions of this kind and thereby know the history of every object, every exchange between their families, before they are ten or twelve years old. A debt unpaid is a sword against the debtor, to be used against him any time, for any reason. Jealousy and spite had surely preyed on the old woman's mind when she had started this discussion, for she had got up to seek out Gao Feet very early, just at dawn.

In the end, the argument was concluded and the crowd scattered by us when we told Short Kwi that we were ready to take him to the hospital in Windhoek if he would go. He said he would, and the people, glaring bitterly at him, at each other, and at us, stood up and went to their scherms, saying to the other members of their families what they would have said to their opponents if they had had a chance.

Soon Short Kwi's werf was nearly empty. The only people who remained were Short Kwi, his family, ourselves, Toma, and Gao Feet. These two talked together, vindicating themselves, and then, before long and before we had a chance to discuss our plans to move Short Kwi, some of the people who had been on Gao Feet's side in the argument came back and crouched beside us stolidly, waiting to hear what might now be said. Jealousy had been aroused.

Because of the long journey and Short Kwi's condition, we thought that it would be best for him to leave at once, but his wife spoke out against this, saying that the rest of her family, probably at this moment on their way here, would be heartbroken to find them gone. She would like to wait for them, she said, to say good-by. Gao Feet agreed with her. He added that if her mother were to come and find her gone the old woman would cry and cry for days, but Toma shook his head. "Perhaps Short Kwi can be helped," he said. "Perhaps

12: Marshall E-5 (1951-1959) 1961 FX10 Bushmen FX10
Kung

deadly poisoned arrows are always at hand. Men have killed each other with them in quarrels—though rarely—and the /Kung fear fighting with a conscious and active fear. They speak about it often. Any expression of discord (' bad words ') makes them uneasy. Their desire to avoid both hostility and rejection leads them to conform in high degree to the unspoken social law. If they do deviate they usually yield readily to expressed group opinion and reform their ways. I think that most /Kung cannot bear the sense of rejection which even mild disapproval makes them feel. They also conform strictly to certain specific useful customs which are like instruments for avoiding discord.

Talking and ' Talks '

I mention talking as an aid to peaceful social relations because it is so very much a part of the daily experience of the /Kung and, I believe, usefully serves three particular functions. It keeps up good open communication among the members of the band; through its constantly flowing expression it is a salutary outlet for emotions; and it serves as the principal sanction in social discipline. Songs are also used for social discipline. The /Kung say that a song composed specifically about someone's behaviour and sung to express disapproval, perhaps from the deepest shadow of the werf at night, is a very effective means of bringing people who deviate back into the pattern of approved behaviour. Nevertheless, during our observations, songs were not used as much as talking. If people disapprove of an individual's behaviour, they may criticize him or her directly, usually putting a question, ' Why do you do that? ' or they may gossip a bit or make oblique hints. In the more intense instances ' a talk ' may ensue.

The /Kung are the most loquacious people I know. Conversation in a /Kung werf is a constant sound like the sound of a brook, and as low and lapping, except for shrieks of laughter. People cluster together in little groups during the day, talking, perhaps making artifacts at the same time. At night families talk late by their fires, or visit at other family fires with their children between their knees or in their arms if the wind is cold.

There always seems to be plenty to talk about. People tell about events with much detail and repetition and discuss the comings and goings of their relatives and friends and make plans. Their greatest preoccupation and the subject they talk about most often, I think, is food. The men's imaginations turn to hunting. They converse musingly, as though enjoying a sort of day-dream together, about past hunts, telling over and over where game was found and who killed it. They wonder where the game is at present and say what fat bucks they hope to kill. They also plan their next hunts with practicality. Women (who, incidentally, do not talk as much as men) gave me the impression of talking more about who gave or did not give them food and their anxieties about not having food. They spoke to me about women who were remembered for being especially quick and able gatherers, but did not have pleasurable satisfaction in remembering their hot, monotonous, arduous days of digging and picking and trudging home with their heavy loads.

Another frequent subject of conversation is gift-giving. Men and women speak of the persons to whom they have given or propose to give gifts. They express satisfaction or dissatisfaction with what they have received. If someone has delayed

12: Marshall E-5 (1951-1959) 1961 FX10 Bushmen FX10
Kung

unexpectedly long in making a return gift the people discuss this. One man was excused by his friends because his wife, they said, had got things into her hands and made him poor, so that he now had nothing suitable to give. Sometimes, on the other hand, people were blamed for being ungenerous (' far-hearted ') or not very capable in managing their lives, and no one defended them for these defects or asked others to have patience with them.

As far as we know, only two general subjects are taboo in conversation. Men and women must not speak openly together of sexual matters except as they make jokes in the joking relationship. The /Kung avoid speaking the names of the gods aloud and do not converse about the gods for fear of attracting their attention and perhaps their displeasure. They told us their myths, but only when we asked them to. It is evidently not the habit of these Bushmen to recount the myths as they sit by their fires. They do not invent stories. They said they had no interest in hearing things that are not true and wonder why anybody has.

While a person speaks the listeners are in vibrant response, repeating the phrases and interposing a contrapuntal ' eh '. ' Yesterday ', ' eh ', ' at Deboragu ', ' eh ', ' I saw old /Gaishay.' ' You saw Old /Gaishay ', ' eh, eh '. ' He said he had seen the great python under the bank.' ' EH! ', ' The PYTHON! ' ' He wants us ', ' eh, eh, eh ', ' to help him catch it '. The ' ehs ' overlap and coincide with the phrase and the people so often all talk at once that one wonders how anyone knows what the speaker has said.

Bursts of laughter accompany the conversations. Sometimes the /Kung laugh mildly with what I would call a sense of humour about people and events, often they shriek and howl as though laughter were an outlet for tension. They laugh at mishaps that happen to other people, like the lions eating up someone else's meat, and shriek over particularly telling and insulting sexual sallies in the joking relationship. Individual singing of lyrical songs, accompanied by the *//guashi*, or snatches of the medicine music, the playing of rhythmical games, the ceremonial dances themselves occupy the evenings, as well, but mostly the evening hours are spent in talk.

' A talk ', as the /Kung call it, differs from a conversation or an arranged, purposeful discussion. It flares spontaneously, I believe from stress, when something is going on in which people are seriously concerned and in disagreement. I think that no formalities control it. Anyone who has something he wants to say joins in. People take sides and express opinions, accusing, denying, or defending persons involved. I witnessed one ' talk ' only, in 1952, which I mentioned before[1] and should mention again in this context. It occurred over a gift-giving episode at the time of /Nai's betrothal and involved persons in Bands 1 and 2 who were settled near together at the time. Khuan//a, the mother of /Gunda, /Nai's fiancé, had diverted a gift which people thought was making its way to Gao Medicine, the present husband of /Nai's mother. Instead of giving it to him at the time when an exchange of gifts was in order, she gave it to one of her relatives. /Nai's mother's sister, /U, sitting at her own scherm, began ' the talk ' by letting it be known what she thought of Khuan//a, in a voice loud enough to be heard in the two werfs, a startling contrast to the usual low flow of talk. Di/ai, /Nai's mother, sitting with her shoulder pressed against her sister's, joined in. People in the werfs went to sit at each other's scherms, forming little groups

12: Marshall E-5 (1951-1959) 1961 FX10 Bushmen FX10
Kung

of the hunting party is not a matter of convention or of anxious concern. Hunting parties are freely organized by men who like to hunt with each other. No categories of kin or affines are prohibited from hunting together, whether they have a joking relationship or not or practise the sitting and speaking taboo. Men from different bands may hunt together.

A father has authority over his sons and sons-in-law and could tell them to go hunting or to accompany him and would expect them to obey. In other relationships participation in a hunting party is voluntary. Any man may instigate a hunt and may ask others to join. No one is formally in command of a party, unless he is the father with his sons or sons-in-law, but often an informal kind of leadership develops out of skill and judgement and the men fall in with the plans and suggestions of the best hunter or reach agreement among themselves somehow.

Hunting parties are usually composed of from two to four or five men. One hunter alone is at a disadvantage. A man cannot leave the meat unguarded from lions, hyaenas, jackals, and vultures while he goes to bring help from the band to carry it nor can he carry it alone. Only occasionally are parties larger than four or five. For two parties to hunt in different directions would be more advantageous than to form a larger single party.

When the kill is made the hunters have the prerogative of eating the liver on the spot and may eat more of the meat until their hunger is satisfied. If they are far from the band, they may eat the parts that are especially perishable or most awkward to carry, like the head, and they sometimes eat the cherished marrow. They then carry the animal to the band, either in its parts, bones and all, or, if the animal is very big, leaving most of the bones and cutting the meat into strips which dry in the sun to biltong and are more easily carried on the carrying-sticks. The blood is carried in bags made of the stomach, rumen, and bladder.

The gall bladder and testicles are discarded at the kill. Eventually the hooves are thrown away and usually the picked bones and horns. (The /Kung make only a few artifacts of bone and horn which last a long time and seldom need replacing.) Sinews are kept for making cord. The hide would be skinned off whole and tanned if it were suitable for a kaross and someone wanted a new kaross at the time. Otherwise, the hide is dried, pounded up, and eaten. Hides are quite tasty. Feet are picked of every tissue; gristle is dried and pounded. Soft parts, such as the foetus, udder, heart, lungs, brains, and blood, are often given to old people with poor teeth. Intestines are enjoyed and desired by all. The meat of the rump, back, chest, and neck is highly appreciated. Nothing is wasted; all is distributed.

The owner of the animal is the owner of the first arrow to be effectively shot into the animal so that it penetrates enough for its poison to work. That person is responsible for the distribution. The headman of the band is not the one to distribute the meat by virtue of his headmanship, unless he happens to be at the same time the owner of the arrow. The owner may or may not be one of the hunters.

Hunters have arrows which they acquire in three different ways. Each man makes arrows for himself, shaping the points (usually now of metal, but still possibly of bone or wood) with some slight distinction so that he will know them from the arrows of other men. Secondly, arrows are given as gifts. The man who made the arrow or who himself acquired it as a gift, may give it to someone else, either a man or a woman, consanguineous kin, affine, or friend.

12: Marshall E-5 (1951-1959) 1961 FX10 Bushmen FX10
Kung

It ends in everybody getting some meat.

In the later waves of sharing, when the primary distribution and primary kinship obligations have been fulfilled, the giving of meat from one's own portion has the quality of gift-giving. /Kung society requires at this point only that a person should give with reasonable generosity in proportion to what he has received and not keep more than an equitable amount for himself in the end, and that the person who receives a gift of meat must give a reciprocal gift some time in the future. Such factors as the category of relationship of kin, affines, or non-related persons, the joking relationship, status, and band affiliation impose no pattern on this giving. People give to whom they please, this time to some, next time to others, more generously or less generously according to their own (to us often unfathomable) reasons. We are certain, however, that the motives are the same as in gift-giving in general: to measure up to what is expected of them, to make friendly gestures, to win favour, to repay past favours and obligations, and to enmesh others in future obligation. I am sure that when feelings of genuine generosity and real friendliness exist they would also be expressed by giving.

In the parts and quantities of meat first distributed or given in the later waves of sharing there seemed to be no taboo and no rigidity of rule.

The distribution of an eland which was killed by Gao Beard, headman of Band 2, will serve as an example. There were more than a hundred /Kung at Gautscha at the time of the hunt. Both Gautscha bands (Bands 1 and 2) were present. Bands 3, 4, and 7 were visiting and there was a sprinkling of visitors from other bands.

The hunting party was composed of four men: Gao Beard; his first wife's brother, //Ao, and his own brother, /Qui, both of whom lived with him in Band 2; his brother-in-law, /Naishi, the husband of his sister, //Kushay. They were visiting at the time.

The party had hunted for eight days without success in heat so exhausting that they had to lie covered with sand through the middle part of the day.

/Qui was the first to see the eland. It was a huge one. As /Qui had been asked to come on the hunt by his brother to help him, he told Gao Beard where the eland was and did not shoot at it himself.

Two boys joined the men to track the eland after it was shot. The party tracked it for three days and then found it dead from the poison. They cut up the meat and brought it to the werf at Gautscha, which was two days' travel away. The hunt had lasted thirteen days in all.

Gao Beard was himself the owner of the arrow. The arrow had been given by one person to another five times. /Gao Music (Band 1), who made it, gave it to his sister, /Goishay, who gave it to her husband, ≠Gao, headman of Band 3. He gave it to his brother, Gao, also of Band 3, who gave it to his wife, Di/ai. Di/ai gave it to Gao Beard, her brother, who shot the eland with it and who was responsible for the distribution of the meat.

Gao Beard first gave meat to the hunters who helped him, as was the custom. To /Naishi he gave a forequarter and to //Ao a forequarter and the head. (The hunters usually received a forequarter or hindquarter or an equivalent amount. The head was an extra gift.) The two boys who helped track got nothing—because their fathers would give them some, we were told. To our astonishment, /Qui was given nothing. Gao Beard explained that his brother would eat from his pot. (Actually he

12: Marshall E-5 (1951-1959) 1961 FX10 Bushmen FX10
Kung

to the /Kung. It gives one the responsibility of choosing when to eat one's meat and struggling with hunger as best one can when it is finished, without occasion or excuse for blaming others for eating more than their share.

It has often been reported that, when Bushmen kill an animal, they gorge themselves until they can hardly walk. We have seen the Nyae Nyae /Kung eat hearty meals of meat when they have been long without, but nothing more than we considered a normal amount. They hang meat in the bushes to dry and can keep it for some time. It is not uncommon for them to eat quite sparingly and save bits for a coming journey or against a future day of hunger.

The /Kung are quite conscious of the value of meat-sharing and they talk about it, especially about the benefit of the mutual obligation it entails. The idea of sharing is deeply implanted and very successfully imposes its restraints. To keep meat without sharing is one of the things that just is not done.

Gift-giving

The custom of gift-giving comes, in my opinion, second only to meat-sharing in aiding the /Kung to avoid jealousy and ill will and to develop friendly relations. /Kung society puts considerable emphasis on gift-giving. Everything a person has may have been given to him and may be passed on to others in time. The /Kung make their artifacts, on the whole, of durable material and take good care of them. They last for generations and move in a slow eddy among the people. The dealings are only between individuals, but they are numerous and provide occasion, perhaps more than any one other activity does, for visits which bring whole bands into polite encounter.

We gave cowrie shells as parting gifts in 1951 to the women in ≠Toma's band, the band which first sponsored us and with which we stayed and did our consistent work, wherever they were, on each expedition. We had carefully observed that there were no cowrie shells among /Kung ornaments before we gave them. Ours were bought from a New York shell dealer, perhaps to the confusion of future archaeologists. We gave to each woman enough for a short necklace, one large brown shell and twenty smaller grey ones. In 1952 there was hardly a cowrie shell to be found in Band 1. They appeared, not as whole necklaces, but in ones and twos in people's ornaments to the edges of the region.

The /Kung have not developed special objects to use as gifts. Nor have they invested ordinary objects with special gift significance. What they give each other are the common artifacts and materials of everyday life (see Appendix). Some objects are more highly valued than others as gifts, as one would expect. I gathered that relative scarcity of material was a factor and that objects were appreciated for their beauty, workmanship, and appropriate size (a wide headband is better than a narrow one). People took an interest in remembering to whom an object had been given in the recent past, but the /Kung, who are present-oriented, do not place special value upon antiquity as such or systematically hold the distant past in mind.

The /Kung decorate their artifacts very little (they have developed music and dancing, not the plastic or pictorial arts), but they delight in ornaments with which to adorn themselves. The intrinsic beauty, the meaningfulness, and the relief to the monotony of yellow-brown skin and grey-brown leather karosses are all valued.

301 The most highly valued gifts are the traditional ornaments of ostrich egg-shell beads, especially the wide headbands and necklaces of five or six strings of beads reaching 431 to the umbilicus. The creamy white is becoming to them. They like European beads also, of all colours, though white is definitely their preference. The only thing they do not like about beads, Gao Beard told us, is shortness of the string. After ornaments, the /Kung value implements or utensils, *//gwashi* or dance rattles, which have required time and care to make, but perhaps more especially valued are metal objects and pots. The latter are obtained by trade. The /Kung do not trade among [438] themselves. They consider the procedure undignified and avoid it because it is too likely to stir up bad feelings. They trade with the Bantu, however, in the settlements along the B.P. border. The /Kung offer well-tanned antelope hides and ostrich egg 439 shell beads. For these they obtain tobacco, beads, knives, axes, malleable metal for making arrow-points and spear-blades, and occasional files and chisels, fire-strikers, and pots.

The odds are with the Bantu in the trading. Big, aggressive, and determined to 435 have what they want, they easily intimidate the Bushmen. Several /Kung informants 439 said that they tried not to trade with Herero if it was possible to avoid it because, although the Tswana were hard bargainers, the Herero were worse. /Qui said he had been forced by a Herero whom he was afraid to anger to trade the shirt and pants we had given him as our parting gift in 1932 for a small enamel pan and a little cup. /Ti/kay had more gumption. A Herero at the beginning of a negotiation with him brought out a good-sized pile of tobacco but took from it only a pinch when it was time to pay. /Ti/kay picked up the object he was trading and ran off. ≠Toma said with amused exaggeration that 'a very good Herero, a respectable one, will give a handful of tobacco for five cured steinbok skins. A bad Herero will give a pipeful (he showed the size of his fingernail) for three skins.' The Tswana values are a little better. A well-tanned gemsbok hide brings a pile of tobacco about 14 inches in diameter and about 4 inches high. The values vary. Some that were reported to us were three rooibok, duiker, or steinbok skins for a good-sized knife, five strings of ostrich egg-shell beads for a spear.

439 The /Kung have become dependent on metal, especially knives, axes, and arrow-
[Tm] points. They have been able to trade enough for every man to have these implements.
[911] They could, however, exist without them and do still use a few bone and wood arrow-points. Poison makes their arrows deadly, not penetrating power. The pots are Ovambo or Okavango pottery (the /Kung make no pottery themselves) or European ironware. The /Kung like to have a pot around to borrow sometimes; not [858] everyone wants to carry one. They cook mostly in hot ashes. More for their novelty, I thought, than for their worth, the /Kung trade also for old oddments of cloth garments (they weave neither cloth nor mats), pieces of blankets, basins, &c.—things they do not really need—but which they like.

Tobacco they need 'to make the heart feel better'. Oddly enough for these pas- 431 sionate smokers, tobacco was not given so much emphasis in gift-giving as one might expect. They do make gifts of tobacco, but when anyone lights a pipe he passes it around anyway; all present drag smoke into their lungs until they almost faint and it has not mattered much who owned the tobacco.

302 Eland fat is a very highly valued gift. An eland provides so much fat that people
431

12: Marshall E-5 (1951-1959) 1961 FX10 Bushmen FX10
Kung

can afford to be a little luxurious. They rub it on themselves and on their implements and they eat it. ≠Toma said that, when he had eland fat to give, he took shrewd note of certain objects he might like to have and gave their owners especially generous gifts of fat.

Real property and the sources of food and water are owned by the headman for the band and cannot be given away. However, meat, once it is distributed after the hunt, and veldkos, once it is gathered, become private property and may be given. Artifacts are privately owned by the individual man, woman, or child, as outrightly owned if received as a gift as if made by the individual. They borrow and lend a great deal—in itself this is one of the ways they support each other and aid themselves in maintaining social solidarity—but this does not blur the clarity of ownership. Each object acquires some markings of its own from the maker and from usage. It is easy for the /Kung, with their highly developed powers of observation and visual memory, to keep track of the commonest objects, know the ownership, and remember the history of the gifts.

As far as we know, no artifacts or materials are taboo as gifts. For instance, women may be given weapons, although it is taboo for women to touch them.

In quantity the gifts varied. One which /Ti/kay gave to ≠Toma was considered generous. It was a fine ostrich egg shell headband, three ostrich egg shells, and a well-tanned duiker skin as soft as suede. Another generous gift consisted of a knife, a spear, and a triple string of traded white European beads. Often gifts were less. The feelings persons have for each other, the degree of their past indebtedness, what they happen to possess and can give, determine the generosity of the gift.

The acquisition *per se* of the objects was seldom, I believe, of primary importance to most individuals in gift-giving—that is, if the objects were their own artifacts. As the /Kung come into more contact with Europeans—and this is already happening—they will feel sharply the lack of our things and will need and want more. It makes them feel inferior to be without clothes when they stand among strangers who are clothed. But in their own life and with their own artifacts they were comparatively free from material pressures. Except for food and water (important exceptions!) of which the Nyae Nyae /Kung have a sufficiency—but barely so, judging from the fact that all are thin though not emaciated—they all had what they needed or could make what they needed, for every man can and does make the things that men make and every woman the things that women make. No one was dependent upon acquiring objects by gift-giving.

They lived in a kind of material plenty because they adapted the tools of their living to materials which lay in abundance around them and which were free for anyone to take (wood, reeds, bone for weapons and implements, fibres for cordage, grass for shelters), or to materials which were at least sufficient for the needs of the population. The Nyae Nyae /Kung had hides enough for garments and bags; they kept extra hides when they needed them for new garments or when they wanted them for trade; otherwise they ate them. The /Kung could always use more ostrich egg-shells for beads to wear or trade with, but, as it is, enough are found for every woman to have a dozen or more shells for water containers—all she can carry—and a goodly number of bead ornaments.

In their nomadic hunting-gathering life, travelling from one source of food to

182 another through the seasons, always going back and forth between food and water,
●431 they carry their young children and their belongings. With plenty of most materials at hand to replace artifacts as required, the /Kung have not developed means of permanent storage and have not needed or wanted to encumber themselves with surpluses or duplicates. They do not even want to carry one of everything. They borrow what they do not own. With this ease, they have not hoarded, and the
[556] accumulation of objects has not become associated with status. Instead of keeping things, they use them to express generosity and friendly intent, and to put people
[154] under obligation to make return tokens of friendship. And, even more specifically, in my opinion, they mitigate jealousy and envy, to which they are prone, by passing things on to others. These are the objectives in gift-giving.

431 Except, as ≠Toma said, that it would be surprising to see a man give a present to a woman who was not related to him (and vice versa, I imagine), anyone may give to anyone. Degree or kind of kinship or affinity, having the joking relationship or lacking it, impose no requirements or restrictions, nor does status in the community in a conventional way. We did hear people say, however, that a headman may feel that he should lean well to the generous side in his giving, for his position as head-
[602] man sets him out from the others a little and he wants whatever attention this attracts not to be envious. Someone remarked that this could keep a headman poor.

The times of giving are determined almost entirely by the individual's convenience. The /Kung do not know their birthdays or anniversaries and have no special days of the year which they mark by giving gifts. Gifts are required by convention on only three ceremonial occasions. The type or quantity of the gift is not patterned but it should be generous. The occasions are betrothals and weddings, when the
[585] parents exchange gifts and give to the young couple, and the ceremony of a baby's
[854] first haircut, when the */gu/na*, the person for whom the baby is named, should give him a fine present.

Relatives give to young people with the idea of setting them up in life. Gao Beard gave a spear and a kaross to his FaSiHuSo, saying it was his duty to see that the boy got some things because among the boy's relatives he was the most able to do so. The boy's father was very old, he explained. People expect to wait a long time for young people to make return gifts.

The two rigid requirements in gift-giving are that one must not refuse a proffered gift and that one must give in return. Demi said that, even if he might prefer not to be obligated to someone, he would accept and prepare to make his return gift. If a gift were to be refused, he continued, the giver would be terribly angry. He would
[508] say, ' Something is very wrong here.' This could involve whole groups in tensions, bad words, taking sides—even ' a talk ' might occur—just what the /Kung do not want. Demi said it does not happen: a /Kung never refuses a gift. And a /Kung does not fail to give in return. ≠Toma said that would be ' neglecting friendship '. A person would know that others thought him ' far-hearted ' and ' this would worry him '.

In reciprocating one does not give the same object back again but something of comparable value. The interval of time between receiving and reciprocating varied from a few weeks to a few years. Propriety requires that there be no unseemly haste. The giving must not look like trading.

12: Marshall E-5 (1951-1959) 1961 FX10 Bushmen FX10
Kung

Incidentally, we were not included by the /Kung in their gift-giving patterns. They gave us a few things spontaneously which they thought we would enjoy—python meat, for instance—but did not feel obligated to reciprocate for every gift we gave them.

Asking for an original gift or asking that a return gift be made after due time has elapsed is within the rules of propriety. People prefer that others give in return without their asking, but ≠Toma says he does not hesitate to ask if a gift is long overdue. If a person wants a particular object he may ask for it. Asking is also a means by which people play upon each other's feelings. One can test a friendship in this way. One can give vent to jealousy or satisfy it by acquiring some object or making someone else uncomfortable. I thought that /Ti/kay (an intelligent man, but very touchy, uncooperative, and turned inward upon himself) used to ask for gifts to play with anger, arousing it for the sake of feeling it, as children do with fear, playing witches in the dark. His remarks one day indicated a mingling of feelings and purposes. He told us that one may ask for anything. He does, he said. He goes to a person's fire and sits and asks. (I could imagine him with his black glancing eyes sitting and asking!) He asks usually for only one or two things, but if a person has a lot he may ask for more. He said he is almost never refused but that if a man had only one pot and /Ti/kay asked for it the man might say, 'I am not refusing, but it is the only pot I have. If I get another you may come for this one. I am very sorry but this is the only pot I have.' /Ti/kay said this would not make him angry unless he were refused too many times. To be refused too many times makes a person very angry. But, said /Ti/kay, he himself did not tire of people asking him for gifts. Asking, he claimed, 'formed a love' between people. It means 'he still loves me, that is why he is asking.' At least it forms a something between people, I thought.

I have stressed the mitigation of jealousy as the important value of gift-giving. /Kung informants stressed more the value of putting people under the obligation of expressing friendship by making the friendly gesture, even if it is only a token gesture. Demi said, 'The worst thing is not giving presents. If people do not like each other but one gives a gift and the other must accept, this brings a peace between them. We give to one another always. We give what we have. This is the way we live together.'

Absence of Stealing

One day, when I wanted to talk with a group of informants about what the /Kung considered to be wrong-doing, I began with /Ti/kay. He said promptly, 'Making crooked arrows and fighting', but could not think of anything else. Informants had previously said that not sharing food would be the worst thing they could think of. Others had mentioned that the breaking of the incest and menstruation taboos would be very wrong and that girls should not sit in immodest posture. No one seemed to think lying was very serious wrong-doing, and no one mentioned stealing. I finally asked directly and Gao Medicine said they had not thought to mention stealing because they did not steal.

We had heard of the episode of the man taking honey from a tree, honey which had been found and marked and was therefore owned by someone else, and being killed for it by the owner. That was the only episode of stealing that we discovered.

2: Schapera E-4, 5 (no date) 1930
FX13 Hottentot
Bushmen FX10

[423] have seen, individual rights may occasionally be recognized. All
422 portable property is generally owned by individuals, and theft is
[685] severely punished. Huts, which are really of no value, belong to the families occupying them; a man's clothes, weapons, skins, ornaments, utensils, and indeed everything that he makes belong to him alone to do with as he likes, and in the same way anything that a woman makes, e.g. her ornaments, or receives from her husband, e.g. her clothing, is her own property. A man is not free to dispose of the personal property of his wife without her permission. Lebzelter,
867 indeed, goes so far as to assert that among the Kung the sense of private ownership is inculcated even into children. As soon as they are old enough, he says, their parents make for them small bows, digging-sticks, etc., and teach them that they themselves now own these objects and therefore must no longer take those of others.

422 Food, whether vegetable or animal, and water are also private
22 property, and belong to the person who has obtained them. Everyone who has food is, however, expected to give to those who have none. Thus a man who shoots a buck or bird will cut it up, and share with the other people present—but the dividing is done by him, and the skin, sinews, etc., belong to him to be done with as he pleases. In the same way all veldkos is also shared by the members of the band. The result is that practically all food obtained is evenly distributed through the whole camp. But, as we have seen, caches of ostrich egg-shells containing water may be stored away, and these belong to the person who hides them and may not be used without his
[685] permission; while private rights may also be acquired over wild honey or ostrich eggs, and theft in such cases is severely punished.

428 The question of inheritance rarely arises, as generally most of a
[768] man's possessions, especially his weapons and clothing, are buried with him. But during her lifetime a woman will often hand over her
[431] ornaments to her daughter; while among the Auen such of a man's belongings as are not buried with him, e.g. utensils and skins, are inherited by his eldest son. The younger sons and daughters get nothing, nor does the widow, but she keeps her own property. So, too, among the Namib Bushmen, according to Seydel, a man's weapons, clothing, sandals, cooking utensils, and hunting dogs are inherited by the eldest son. At the same time, he adds, the usage
[425] exists that as soon as the eldest son thus becomes sole heir to his late father, all the property he has himself hitherto possessed, such as weapons, clothing, etc., must go to his next brother. Widows and

15: Marshall E-5 (1951-1961) 1965
FX10 Bushmen FX10
!Kung

in several different bands, and they may choose among them. A band that owned comparatively good resources would tend to attract more members than a band with scant veldkos. This flexibility of residence pattern is one of the reasons that one finds the bands of the interior of the Nyae Nyae region relatively in balance with their resources, and varying in size.

WATER • Two or more bands may share the ownership of a water hole. Water holes keep their own rough population balance because, if water is very scarce, people will go to live elsewhere when they have the possibility of doing so.

In the interior of this region, in roughly 8000 square miles, there are three water holes that can be called really permanent. In the driest years these do not fail. Four others dry up only in years of severe drought. Six more are semipermanent: in a very good year they may yield a little water right through, but in a dry year they are sure to dry up. When the semipermanent water holes go dry, the bands who own them may break up temporarily and the families may go to live with relatives who are at permanent water holes, or they may go as whole bands to another water hole where they have relatives.

Water is not owned as exclusively or as jealously as veldkos. Water seems to belong more to mankind, as the animals do, and the ownership of water holes emphasizes more the managing than the withholding of the water. The headman controls the water. His permission should be asked by travelers or visitors before taking water, "because he knows what he has and what can be done," we were told. We saw small temporary water holes marked with bundles of grass thrust into forked sticks. This was to tell visitors or travelers that the owners of the water hole were in residence, as it were, and were counting on the water. We believe that in these circumstances water would not be taken without permission. Occasions are not likely to arise where permission need be refused. The !Kung know where the others are, or are likely to be, at a given time and know how much water is available. They plan better than to get themselves into desperate situations.

One source of water appears to be owned by individuals. It is the rainwater that collects in hollow mangetti trees. The water in trees is not stolen by others who go to gather in the same mangetti forest. Water, incidentally, is the only beverage of the !Kung in the interior of the region. They have no alcoholic drinks and use no infusions of herbs.

HUNTING AND MEAT SHARING • !Kung hunting regulations do not confine the hunters to territories. The game animals belong to no one until they are shot, and the hunters may follow them anywhere the spoor leads and may cross the territorial boundaries of any band. If hunters have made a kill in the territory of a neighboring band, they would not fail to give a present of

15: Marshall E-5 (1951-1961) 1965
FX10 Bushmen FX10
!Kung

meat to the owners of the territory should they happen to encounter them, but this is a gift, not an obligatory tribute. The vastness and emptiness of the country allow this freedom in hunting rights and the wandering nature of the game requires that the hunters, if they are to succeed at all, be free to look for game wherever they can find it.

The !Kung eagerly pick up tortoises, certain kinds of lizards, snakes, ostrich eggs, and grasshoppers, and they relish termites when these insects swarm out in nuptial flight. These items provide incidental delicacies and gathering them is like the gathering of veldkos. The person who gathers them may keep them for himself and his own family. Men gladly shoot small animals and birds if they happen upon them—wart hogs, duikers, other small antelope, porcupines, badgers, pythons, spring hares, ostriches, paouws, guinea fowl, red-winged partridges, occasional migrating geese, and other birds. They may keep them for their own families. They do not, however, devote their hunting time to the smaller animal creatures if they find fresh spoor of the larger ones. Hunting the big game animals that feed a whole band is the work of a man's prime and is incumbent on him.

Hunting parties usually consist of from two to four or five men. A man cannot hunt effectively alone in this country. Several parties hunting in different directions are more advantageous than one larger party. Any man may organize a hunting party, with relatives and friends from his own band or from neighboring bands—men he likes to hunt with. No one is formally a leader; the men talk and plan together and are likely to fall in with the suggestions of the one whom they consider the best hunter. Participation in any given hunting party is voluntary. What !Kung society urges is that the hunters hunt; it does not restrict the ways and means. The force of public opinion upon men not to sit in the werf, not to be lazy but to do their share, is tremendous.

The game the !Kung hunt deliberately and purposefully are the several big antelopes found in the region: eland, kudu, gemsbok, wildebeest, hartebeest, springbok. They also hunt the more rarely seen buffalo and occasionally manage to shoot a giraffe. Although there is this considerable variety of kind, there is not a great abundance of game. The herds are small and the hunts long and hard.[8] The antelope, because they can go for long periods without drinking, move and drift about anywhere in the vast monotonous veld and are very difficult to find. Hunters often search for days, covering scores of miles, before finding spoor fresh enough to follow, and they may follow it for days before catching up with the animal. Their little arrows kill by poison rather than by piercing deeply, and, when an animal is shot, if it is big, it may wander for three or four more days until it dies of the poison. Smaller animals succumb in a shorter time. The hunters must track the animal and find it before the lions, leopards, hyenas, jackals, or vultures de-

your if.

15: Marshall E-5 (1951-1961) 1965
FX10 Bushmen FX10
!Kung

vour it. Thus, according to our observations, a !Kung band gets on an average 224
only about fifteen to eighteen large animals in a usual year.

The meat of the large game animals does not belong to the hunters to do with as they choose. However, they always have the prerogative of eating the [262]
liver at the site of the kill and, if their hunger is not satisfied, they may eat more. The bulk of the meat is then carried to the band, where it is distributed among the members according to a system. The meat belongs to the owner of the first arrow that penetrates the animal so that it stays in. He has the responsibility of making the first distribution.

Anyone in the band may be the owner of the arrow. A hunter carries 224
arrows he acquires in three different ways. Each man has his own that he 411
makes himself, shaping the points with some little distinction so that he 422
will know them from the arrows of other men. In addition he carries 426
arrows that have been given or lent to him. When an arrow is given to him, 431
he is the owner as much as if he had made it himself, but if he uses that 571
arrow he must make a special gift of meat to the donor. When he uses an arrow that is loaned to him, he merely shoots for the person who lent it and who remains the owner of the arrow. !Kung society makes a great deal of giving and lending arrows. Women and old men, as well as men in their hunting prime, receive arrows as gifts and may give them or lend them to a hunter, asking him to shoot for them. A hunter cannot refuse an arrow— [576]
as a person cannot refuse any gift—without offending the giver. He accepts the arrow and with it an obligation, but he gives or lends arrows in return and involves others in obligation to him. Hunters choose to use one or another of their arrows, with the result that the responsibility of distributing the meat, with its advantages and obligations, is shared by members of the band as is the meat itself.

In the first distribution the whole animal is divided among a few 224
persons, who receive whole sections on the bone, unless the animal is so large that the meat has to be cut off in strips to be carried. The first of these persons are the hunters, each of whom gets a fore- or hindquarter or the equivalent. The giver of the arrow (if the arrow was not made by the owner himself) receives a generous portion. The owner of the arrow, who may be one of the hunters, or anybody, keeps the rest.

In the second distribution, the several persons who got meat in the 224
first distribution cut up their shares and distribute them further. The 602
amounts depend on the number of persons involved, but should be as much as the giver can manage. In the second distribution, close kinship is the factor that sets the pattern of giving. A man's first obligation at this point [606]
is to his wife's parents. He must give to them the best he has in as generous [593]
portions as he can while still fulfilling other primary obligations, which are to his own parents, his spouse, and offspring. He keeps a portion for himself at this time and from it would give to his siblings, to his wife's siblings, if

15: Marshall E-5 (1951-1961) 1965
FX10 Bushmen FX10
!Kung

224 602 they are present, and to other kin, affines, and friends who are there, possibly only in small quantities by then.

Everyone who receives meat gives again, in another wave of sharing, to his or her parents, parents-in-law, spouses, offspring, siblings, and others. [574] This meat may be cooked and the quantities small. Visitors receive small amounts of cooked meat from their hosts. It ends in everybody getting some meat.

224 431 In the later waves of sharing, when the primary distribution and primary kinship obligations have been fulfilled, the giving of meat from one's own portion has the quality of gift giving. !Kung society requires at this point only that a person should give with reasonable generosity in proportion to what he has received and not keep more than an equitable amount for himself, and that the person who receives a gift of meat must give a reciprocal gift of meat at some time in the future. People give to whom they please, this time to some, next time to others, more generously or less generously [571] according to their own (to us often unfathomable) reasons. We are certain, however, that the motives are the same as in gift giving in general: the person gives to measure up to what is expected of him, to make friendly gestures, to win favor, to repay past favors and obligations, and to enmesh others in future obligation.

224 431 181 [154] [183] Aside from the practical advantage of using up meat while it is still fresh, the !Kung custom of meat sharing has enormous social value. It does a great deal to mitigate tensions. The fear of hunger is lessened. People are sustained by a web of mutual obligation. Moreover, they are fully conscious of these values, and the custom is so strongly established and so faithfully followed that the idea of not sharing is virtually unthinkable to the !Kung.

422 252 264 Meat is not habitually cooked and eaten as a family meal among the !Kung. When an individual receives a portion he owns it outright. He may give and share it further, as he wishes, but it never becomes family or group property. The men, women, and children may cook their pieces when and as they wish, often roasting bits in the coals and hot ashes and eating them alone at odd times. Or someone may start a big pot boiling and several people will bring their pieces to put into it at the same time, each taking his own piece out when it is cooked.

The sense of possessing one's own piece personally is, I believe, very [261] important to the !Kung. It gives one the responsibility of choosing when to eat one's meat and struggling with hunger as best one can when it is finished, without occasion or excuse for blaming others for eating more than their share.

224 261 It has often been reported that, when Bushmen kill an animal, they gorge themselves until they can hardly walk. We have seen the Nyae Nyae !Kung eat hearty meals of meat when plenty appeared and they had been long without, but nothing more than we considered a normal amount.

on the quantity of objects they want to possess. They do not even want one each of the common tools of their lives. They borrow from each other, and there is less to carry.

Instead of acquiring prestige by accumulating possessions, the !Kung seek it in the opposite way. They practice a custom of gift giving to such an extent that their belongings all move in a slow flowing current among them and no one keeps anything of particular value very long. !Kung society requires that gifts be made in return, and the custom serves as a means to mitigate jealousy, to express friendly intent, and to weave people together in mutual obligation.

SOCIAL ORGANIZATION

THE FAMILY AND THE DOMESTIC GROUP • The family is the primary and the most cohesive social unit of the !Kung. By far the strongest bonds they feel are those of the nuclear family—the bonds between parent and offspring, between siblings, between spouses. These relationships are the basis of residence; by that I mean that people live together and have membership in their bands and rights to its food and water resources because they are linked to the band by one of these relationships. I believe that, in addition to the structured aspects, there is great emotional cohesiveness in !Kung families and that this is observable in the way families within the band build their fires near each other, come and go together, or, if there should be a quarrel, literally stand by each other, drawing close together.

The !Kung family passes through four phases. In its simplest nuclear form it consists of a man, his wife, and such children as are born to them. First marriages are always with just one wife. A later nuclear phase may be polygynous. When the daughters of a !Kung couple marry, and the daughters' husbands come to live with their brides' parents to give them bride service, the unit becomes an extended family. In a second extended phase, the married sons may have returned from bride service with their wives and offspring. In this phase, the married daughters with their husbands and offspring may stay or they may go to live with their husbands' people.

• The headship of a family is strongly associated with males. A widowed mother is regarded as a dependent, not as a family head. When the old father of an extended family dies, that particular family ceases to be an extended family. Families of siblings may live together in the same band, but no one of them has authority over another unless one of the siblings happens to be headman of the band. If they are no longer involved in bride service themselves, and their offspring are not yet married, these families become independent nuclear families again, to become new, extended families when the offspring marry.

132 highs in the 90's. The warmer weather heralds the onset of
312 spring which is the most difficult season of the year. Most
137 of the waterholes have no mongongo nuts within a ten mile
222 radius. The alternative foods, roots and bulbs, are being collected daily by some of the people, while others are making the long overnight journeys to the nut forests.

221 Since territories vary in the abundance of early spring
574 foods there was a noticeable tendency for families to visit
628 other camps. For instance in September, Bate still had a good supply of Sclerocarya caffra nuts, and several families from Dobe, Mahopa, and !angwa converged upon Bate to eat these nuts. Similarly !ubi had a supply of Baobab fruits (Adansonia digititata) and other families made extended visits to relatives there. The maintenance of close ties between camps made possible a more equitable distribution of foodstuffs, so that, if there was scarcity at one camp, and food at another, the members of the first camp would not go hungry. This is one of the highly adaptive features of the fluidity of !Kung group structure.

[563] Some families fall back on the Herero villages at this
[431] time of year to beg for milk. This occurs especially among those people who have a sister or cousin married to a Bantu man. Both the Bushman and Herero codes of good manners demand that visiting in-laws be fed (L. Marshall 1961).
